

Big Sky Maze 2011

The maze is in the shape of a cross and is made up of 20 cones 15' apart. There are 5 gates in the maze which the driver must pass through in numerical order (1 through 5). Each gate has a yellow cone and a white cone – yellow is always on the driver's right and white is always on the driver's left. Each gate will be numbered 1-5 with numbers facing the driver as he/she approaches it.

Faults:

- Disturbed Cone --- 5 pts each
- Failing to go through gates in numerical order or in the right direction is a break of pattern – 20pts.

This is a timed event. Each driver will have 5 minutes to complete the course
